The Library of the Portland Cement Association is a working reference library on the literature of the cement industry. The classification of the books and pamphlets follows the Dewey Decimal Classification System. The library has an up-to-date card catalog of approximately 65,000 cards, conforming to standard library practice. A brief abstract on each card and full analytics make the catalog a ready index to the vast amount of technical literature now written. Some 4,000 magazine clippings are mounted in folders, indexed and ready for circulation. The library contains a valuable file of Member Company publications, and some 1,200 trade catalogs of the appliances and machinery of the cement industry.

In the following pages are listed, by subjects, the books and pamphlets in the Library. The list of periodicals shows one of the greatest sources of information. An author index follows at the end.

References and bibliographies to the uses of cement will be gladly compiled by the library staff. Such service is free. Write for references to,

LIBRARY,
PORTLAND CEMENT ASSOCIATION,
111 West Washington Street,
Chicago.
